spring. Dozen70c

**Don't forget to add 20c extra to help pay post-
age if your order does not amount to \$2 or more.**

GREETINGS FOR 1955

It gives me extra-special pleasure to write this message to my many friends and customers in appreciation of their loyalty. My thanks for your patronage and my sincere wishes for your health and happiness and may countless joys be yours this coming season.

Was '54 a good year, or was it a bad year?

Was it a happy or was it a sad year?

Closed is the record and ended the story

But who knows the sum of its pain and its glory?"

For me it was extremely hot and dry, with temperatures up to 114 degrees and at times I wondered if any of my flowers could survive the heat and grasshoppers—but they did and I have nice roots and bulbs of most kinds, though I am quite short on some varieties so please place your order early and tell me when to ship. When possible name some to use as second choice or give me permission to substitute if I am out of some kinds you select. I will always give equal or better value and this will save you time and extra correspondence.

All bulbs and roots are state inspected—guaranteed true to name and to reach you in good growing condition. If not satisfied when you receive them let me know at once and I will make adjustment. I cannot guarantee all bulbs to grow as too many things beyond my control can happen to them.

Parcel Post rates are very high but all orders amounting to \$2.00 or more are sent postpaid. If less than \$2.00 please add 20c to help pay postage.

DAHLIAS

SPECIAL OFFER—Six unlabeled dahlia roots, \$2.00.

These are all good named varieties—some very finest. Supply limited. Will sent roots with good eye or sprout but cannot replace any that fail to grow.

A FEW POINTERS ON DAHLIA CULTURE

Plant tubers 4 to 6 inches deep and about three feet apart in well worked soil. I usually plant from May 20th to June 10th. Do not plant near buildings or trees—they do best in full sun. Keep top soil stirred, allow no crust to form and keep free of grass and weeds. Do not water unless very dry—then soak thoroughly once a week—a slight sprinkling will do more harm than good. As the buds develop in groups of three—remove the two side buds leaving only the middle or terminal bud and you will have large flowers with longer stems.
